

REMARKS

STATUS OF CLAIMS

Claims 1-10, 12-30, 32-49 and 51-56 have been pending.

Claims 1-6, 10, 12-21, 26, 30, 32-41, 46, and 51-54 are rejected under 35 USC §102(e) as being anticipated by Vong et al., U.S. Patent No. 7,030,837.

Claims 7-8, 22-25, 27-29, 42-45, and 47-49 are rejected under 35 USC 103(a) as being unpatentable over Vong in view of Hollon Jr., U.S. Patent No. 5,768,164.

Claim 9 is rejected under 35 USC 103(a) as being unpatentable over Vong in view of Hollon Jr, in further view of Yokota, JP 08-328692.

Claims 55 and 56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form, including all of the limitations of the base claim and any intervening claims.

In accordance with the foregoing, claims 10, 12-30, 32-49 and 51-54 are cancelled without prejudice or disclaimer and the claims are amended, and, thus, the pending claims remain for reconsideration, which is respectfully requested.

No new matter has been added.

The Examiner's rejections are respectfully traversed.

ALLOWABLE SUBJECT MATTER:

The Office Action, at item 40, indicates that claims 55 and 56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form, including all of the limitations of the base claim and any intervening claims.

In accordance with the foregoing, independent claim 1 is amended to incorporate substantially common inventive and allowable features of dependent claims 55 and 56, namely the allowable and patentably distinguishing features of "a first display section the display of which is turned off during the power saving mode and resumed when restored to the normal mode, the first display section is a main display of the terminal device; a storage section which stores at least one URL on a network; a second display section which displays either the URL stored in the storage section or identification information corresponding to the URL at least during the power saving mode, the second display section is a display visible when the main display of the terminal device is in a closed position; and an access processing section which

executes access processing against the URL, or a URL corresponding to the identification information, displayed on the second display section in response to a cancellation operation of the power saving mode by opening the terminal device from the closed position by an user to obtain information from the URL and display the obtained information in the first display."

Accordingly, Applicants respectfully submit that independent claim 1 is in condition for allowance.

Dependent claims 2-9 and 55-56 are patentably distinguishing at least due to their dependence from the independent claims and/or for reciting patentably distinguishing features of their own. Withdrawal of the rejection of the pending claims and allowance of the pending claims is respectfully requested.

CONCLUSION

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
